

NEWS – August 2008

I look forward to not only keeping you up to date regarding courses, but also to sending you interesting articles, stories and tips regarding healing of animals and humans.

Courses on offer in August

Reiki Second Degree. This course will be held in Hout Bay on the 16th and 17th. Please RSVP no later than the 6th of August.

I am planning another Human anatomy course soon in November (all sooner if needed). Please contact me if you are wanting to attend such a course.

Besides this I am thrilled to say that I, together with Charissa Bloomberg (Registered Psychologist), am planning a dolphin Therapy Retreat and Animal Communication course in October, to be held in Mozambique and run over 4 days (2 October - 6 October 2008).

Please see the flyer for more information.

On the 13th of September I will be hosting a Reiki Practice day. All my Reiki students are invited to attend this informative, yet social occasion. Please RSVP, as space is always limited. Do remember no cost is involved.

I plan to present an Animal Communication Module 1 course on the 20th of September. In this course we look at the basics of animal communication and open your world into to the thoughts and feelings of your beloved animals.

I have many ideas regarding the information that I will in future include on this page but any requests, suggestions or preferences will be considered. I look forward to hearing from you regarding courses and your requests.

Animal Health tip: Place a piece of Amethyst into your pet's drinking water. This crystal helps to ward off ticks and flea's.

Human Health tip: Meditation not only improves the quality of our lives, but also the length of life. Even a five minute meditation is better than no meditation.

Love and light
Debbie
