

NEWS-September 2008

Thank you to all my friends, clients, patients and family for the wonderful feedback regarding this web site. The compliments and constructive criticism has been most welcome.

I would like to thank Jessica and Fritz from Masterweb for putting it all together on my behalf. Thanks also to Danielle Bishoff for all the lovely photos that she took.

Regarding courses and events for September, I look forward to seeing my Reiki students at the Reiki Practice / Share day on the 5th of September. Remember, only 8 people can attend, so please RSVP soonest.

Then on the 20th I will be teaching the Introduction to Animal Communication course. I still have some space available for this course, so if you wish to be one of the 80% of humanity that will, by the year 2012, be able to communicate freely with all species I suggest that this is a good place to start. The above was predicted by astrologers over a hundred years ago!

At present both Charissa and I are busy making final arrangements for the Dolphin Retreat/- Course.

Those people that have already booked are really excited about this opportunity, as we are. It is not every day that we get to spend time with Dolphins in this capacity.

Since embarking on this project I have done extensive research on the dolphins and their ability to heal humans, from conditions both physical, eg arthritis to emotional/mental ailments like depression and ADD. This of course will be Charissa's department. Being a clinical psychologist specialising in Dolphin Therapy I could think of no one better to facilitate this healing journey.

At the same time it will be an opportunity to give back to nature. This we can do by learning the skill of communicating with wild- and domestic animals, and through our love, provide them with healing and a better understanding of their needs and circumstances.

I will also be offering our guests / students the opportunity to attend daily guided meditations, yoga/ stretch excercises and of course, an energy healing session. This could be chakra balancing, aura cleansing, Reiki or Quantum Touch or even a combination-type therapy.

Then of course there is always free time, where we can relax and enjoy ourselves in unspoilt nature.

I am so excited. I know this is going to be an opportunity of a life time. Don't miss it.
