

AUGUST NEWSLETTER

The month of July flew by in a total blur. Yes, time seems to be speeding up at a rate of knots. It is comforting to realize that this process is not just a figment of my imagination but is, according to Quantum Scientists, a reality.

I was fortunate to be invited to spend time on a friend's farm in Stilbaai. This guest farm does Permaculture farming. I was absolutely fascinated by the concept and advise anyone who needs to find themselves, regain sanity or just have a rest, to visit this wonderful place. Courses in Permaculture farming are also run there. You can also enjoy a meal and eat farm grown food. www.wildolivefarm.co.za

From there I went on to Plettenberg Bay to teach Animal Communication. The group of five ladies were fantastic students and upon departure, I felt confident that they would, with a bit of practice, make wonderful animal communicators.

Sadly, what did strike me from stories that were told was that many people living in that area (George to Plettenberg Bay) are extremely poverty conscious. This is something that I have observed over many years of visiting Plettenberg Bay but thought was a figment of my imagination ... sadly not! Guys and girls, get with the program. Has the movie "The Secret" been screened in that area and have you seen it? Anyone heard about the Universal Law of thought matter ... energy follows thought or the Law of Expectation? Yes, just a change of mind can change your life and your circumstances. I look forward to seeing a change in this phenomena.

My animal practice was really busy in the month of July. Sadly (for us humans) 4 of my clients passed over. Two cats and two dogs who fought their illnesses bravely and due to their courage and strength were able to share a year, and in some cases, many more years with their beloved humans.

The journey, although never easy, always teaches me something about life and death. However despite this one consistent message always comes through ... "we do not fear death".

Some of these animals requested euthanasia in the end. One even reminded me of the meaning of the word being "good death". I wish to thank the guardians of these animals for the excellent care, compassion and unconditional love shown to these animals until the very end. Ziggi, Chipalini, Gus and Shumi ... I thank you for the lessons and for allowing me to be your spokesperson to the end. Rest in peace.

I will be asking these animals guardians to write a few lines regarding their personal experience with death in the presence of an animal communicator and will place their comments in a future newsletter.

Till next month.

Love and light
Debbie

PS: Please note some additions and changes to the courses for the rest of the year.
